

**BLUEBONNET**  
EYE CARE

## **PATIENT-OWNED FRAMES WAIVER**

**THERE ARE A FEW THINGS THAT WE WOULD LIKE YOU TO KNOW BEFORE WE PUT NEW LENSES INTO YOUR OWN (PREVIOUSLY WORN) EYEGASS FRAMES.**

1. Although we use the utmost care when manufacturing and inserting lenses into our patients' own (previously worn) frames, an older frame may occasionally break in the process. Plastic materials become brittle, and solder points on metal frames can weaken with wear over time.
2. Therefore, we and our outsourced optical laboratory cannot be held responsible if breakage occurs during the process of putting NEW lenses in your OWN eyeglass frames.
3. Frame manufacturers regularly discontinue old frame styles as they launch new ones. Because of this, we may have difficulty obtaining replacement parts for your own frame if it breaks in the future.
4. Your prescription lenses are an investment in your vision. Because of this, we highly recommend that you order them to be placed in a new, high-quality frame.
5. Bluebonnet Eye Care is not responsible for breaks or damages to your own frames during fitting of lenses.

Please sign below if you have read and understand our recommendations and policies regarding the use of your own (previously worn) eyeglass frames and still choose for us to fill your new prescription lenses in your own frame.

Please note any existing damage:
